Our Patron

As a professional cricketer I've spent most of my life outdoors either playing or coaching, I understand and have witnessed problems that can be caused by excessive exposure to the sun.

Skin Cancer is avoidable if you are prepared to take the necessary precautions. As Patron I urge you all to support the work that our Lions Cancer Institute is doing in the areas of early detection and the search for better treatments .

DENNIS LILLEE

BOARD OF DIRECTORS

Lions Cancer Institute Inc.

Board of Directors 2010 – 2011

PDG Garry Irvine	Chairman
PDG Colin Beachamp	Vice Chairman
Lion Tony Turner	Elected 2 year Director
PDG Darrell Mainard	Screening Coordinator. Elected 1 year Director.
PDG Dora Bushe-Jones	Elected 1 Year Director
Lion Judy Forsyth	Elected 1 Year Director
DG Bill Laundry	Ex Officio 1 year Director
DG Terry Gray	Ex Officio 1 year Director
Lion Mary Gregg	Ex Officio 1 year Director
Lion Dale Thomson	Ex Officio 1 year Director
Paul Katris	Appointed Medical Member. 1 Year.
Lion Don Wheeler	Elected 1 year Director
PDG Bob Huey	Appointed Secretary
Mr Graeme Winters	Appointed Treasurer (resigned on 29 Feb 2011)
PDG Neil Saunders	Appointed Secretary/Treasurer from January 2011

The Lions Cancer Institute is a 'Not for Profit' medical research institution. The Institute holds endorsement from the Australian Taxation Office as an income tax exempt charitable entity (ITEC) and is a deductible gift recipient (DGR).

The Institute holds a license issued under the provisions of the Charitable Collections Act 1946.

Auditor: Owen & Plaistowe

CHAIRMAN'S REPORT

Chairman's report 2010-11

Another year has passed with a few changes to our management of the Institute and further successful association with groups outside the Lions Organisation, all of which are exciting for the future.

During this year we acknowledged the contributions from Past Governor Bob Huey for the Secretary's duties and to Mr Graeme Winters an ex Lion of many years ago for looking after the role of Treasurer. Graeme has other commitments so PDG Neil Saunders has indicated he would be very happy to assume the role of Secretary/Treasurer.

The Board resolved to move out of the Oasis House Nedlands building and we are most grateful to our Director Paul Katris and the Cancer Council who have welcomed us at their offices for our ongoing Board meetings.

Annual General Meetings

AGM's of the Lions Cancer Institute have been poorly attended by Club delegates and two attempts were made in this year, to enable the business to be dealt with, but both attempts failed due to lack of a quorum. It appears that holding our AGM is best achieved locating it in Bunbury, despite the fact that we are a State Project and one may have thought that the City was the most obvious location.

Numbers are always doubtful for these meetings and it could be timely that the Board might enter into discussions formally with one or other of the Lion's Institutes/Foundations with a view to a joint AGM so that we ensure a quorum plus the meeting would be of much interest.

Fundraising

This year the Board trialled a mailout to Clubs which was a mild success as far as public relations is concerned but it appears to have been an abject failure from the perspective of donations.

There is clear evidence that the ongoing work of the Institute continues to depend on the very low level of financial support that we receive from Clubs. It is imperative that as a Board we need to find improved methods of impressing upon our Clubs the importance of what our Institute contributes to the communities of this State and that we must have financial input.

It will be an emphasis by the Board to have a programme of visitations to Clubs to encourage funding for the Screenings in particular which are costly but so valuable for those people we find with life threatening skin lesions.

“It will be an emphasis by the Board to have a programme of visitations to Clubs.”

Prof George Yeoh

Last year the Grant made to Prof Yeah, via the Cancer Council gave the Institute some valuable exposure and as a consequence we were fortunate, and still are fortunate, to have the support of Prof. Yeoh, not just as a Researcher but as a proponent of the work we do in our communities. His address to the W2 District Convention was a wonderful reminder to everyone that the long road ahead in the fight against cancer and the need to fund ongoing research is money well spent.

“The need to fund ongoing research is money well spent.”

RFDS “On the Road”

It has been five years now that we have worked with the RFDS and supported them with a skin screening service covering communities throughout the north of the State. Both Organisations contribute independently but cooperate jointly in the interests of outback communities. Our professional personnel are a most important and respected component of every one of the screenings we provide and without them we would not be able to continue. They very kindly work with this aspect of our screenings and we are sincerely appreciative of what they give to the “On the Road” programme.

Skin Screening Van

It is no secret that we have reached the point where we must face the expense of a replacement for the ageing van which has travelled the State and provided excellent service over many years. After a near serious accident in Esperance it was decided to look at trying to raise funds for a single unit to replace the existing truck and trailer.

The Board has agreed to a submission to LCIF for a Grant and will attempt to raise the balance via our Clubs and from any other respectable source.

I have enjoyed my 4th term as Chairman of the Institute so will not stand for re-election to that position but as always will retain a close association to what I believe is one of, if not the single best Lion’s project, to visibly promote Lions across this State.

In conclusion my sincere appreciation to the members of the Board for their co-operation and support and a special thanks to PDG Colin and wife Lion Sue who diligently drive our screening programme and to those wonderful non Lion professional personnel and volunteers who donate their time to our cause in the fight against skin cancer.

Garry K Irvine PDG

Chairman

SKIN CANCER SCREENING REPORT

The demand for the skin cancer screening team continues to increase each year.

Since our last report the Team has attended nine individual screenings plus a trip through the Goldfields, funded by BHP visiting Ravensthorpe, Esperance, Scaddan, Norseman, Coolgardie, Kambalda, Kalgoorlie, Mt. Keith, Cliffs Mine Site, Leinster Mine, Murran Murran, Leinster Town, Leonora, Laverton and Menzies. The trip finished with Screening in Beverley.

We will complete this year with screenings in Merredin, Jurien, Margaret River, Kojonup, Wandering and Claremont/Nedlands.

Murran is a Westrac site, we also screened at Westrac Kalgoorlie, Guildford, Welshpool and Bunbury these are the only corporate screenings undertaken. Westrac has supported the new van with a donation of \$12,000.

The JV project through the Goldfields with the RFDS 'On the Road' program again proved to be very successful with a number of serious suspect lesions diagnosed.

Our thanks to the entire volunteer staff especially Monika and Lester Cowell and Chris and Siva Lowings, dermatologist Kurt Gebalier & plastic surgeon Robert Fitzpatrick.

“Our thanks to the entire volunteer staff.”

We are now in the early planning stages for the Pilbara next year and a possible trip to the

Kimberleys.

A generous donation from the Karratha/Dampier Lions Club will see the team attend the Fenacing 40th anniversary Festival in July next year.

Skin Cancer costs in Australia are estimated in excess of \$294 Million Dollars annually, your Lions Cancer Institute has, for over twenty years, made a considerable contribution towards reducing the costs and trauma involved by early diagnosis of both life threatening and non life threatening skin cancers.

In late 2010 we commenced discussions with Dr. Claire Harvey from Flinders University South Australia, we are now able to confirm that the Lions Cancer Institute will play a major role in a five year research program surrounding the early diagnosis of skin cancers by Nurses and Nurse Practitioners.

We are also working with Dr. Harvey investigating

the possibility of the Lions Cancer Institute hosting a nurse training program in Western Australia.

“Investigating the possibility of the Lions Cancer Institute hosting a nurse training program in Western Australia”

Fund raising for the new screening facility is progressing very slowly.

The Institute has approached Lions Clubs International foundation, Lottery West and two corporate sources, we are yet to receive any results.

If your club can assist with this *Life Saving* program please consider a donation. One of our board members would be only too happy to visit your Club as a guest speaker to keep your members informed.

SKIN CANCER: FAST FACTS

- Skin cancers account for 80% of all newly diagnosed cancers
- By the time they are 70, two in every three Australians will be diagnosed with skin cancer
- GPs in Australia have over 1 million consultations per year from skin cancer effected patients
- Australia has one of the highest incidences of skin cancer in the world
- Skin cancer is the most expensive cancer
- Every year more then 10,300 people are treated for melanoma
- In 2007 alone, between 448 to 1279 people died from skin cancer

LIONS CANCER INSTITUTE PROJECT

A Nurse Led Skin Cancer Screening Program – Contributing to Health Reform

Researchers: Dr Clare Harvey, Mr Christopher Lowings, Mr Colin Beachamp, Mr Paul Katris

This is a collaborative study between Flinders University School of Nursing & Midwifery, and Lions Cancer Institute (Western Australia) which seeks to examine the development the role of Nurse Practitioner (NP) for employment in advanced skin screening and diagnostic techniques.

Whilst the role of NP is central to the research, it is not the focus of the research. By actively initiating new models of care in the screening and early detection of skin cancer, the use of NPs fulfills the objectives of the Australian health reform that seeks to ensure that the people of Australia have access to primary health care programs that support health and wellbeing, and this includes early detection of disease processes.

Therefore, the research aims to analyse the impact that this alternate model of care will have on both the access to skin screening programs, and the equity of care that an expanded service provides to the Australian population.

Building on the original pilot study by Katris et al. (1998) we will evaluate and track the development of the NP role in skin cancer screening and diagnosis, with a focus on expanding the diagnostic skills to include such

diagnostic tests as punch biopsies and the timely referral to medical specialists once a preliminary diagnosis has been established.

The study will also develop a business model for NPs for screening and early detection of skin cancer which will attract Medicare rebates in accordance with the recent changes to the Medicare Act.

The study has ethics approval through the Flinders University of South Australia Social and Behavioural Ethics Committee and will continue over a five year period.

The research framework uses the Pan Canadian Primary Health Indicators as the basis for data collection which will include the tracking the trends of early detection and referral to specialists from RN and NP screening processes, analysing the success rate of the diagnostics tests being undertaken by NPs, and examining the uptake of nurse led skin cancer screening programs. Analysis will focus on the financial and clinical efficacy of the programme.

“Analysis will focus on the financial and clinical efficacy of the programme.”

In order to ensure quality in service delivery, we are developing a training program intended to enhance the diagnostic skills of RNs working in the skin cancer screening programs and to evaluate the efficacy of that training in practice.

This will be delivered online, through the Flinders University School of Nursing & Midwifery Nurse Practitioner Continuing Education Programme, with workshops being provided onsite, with Lions Cancer Institute. The first training programme is scheduled towards the end of this year.

University and Lions Cancer Institute on the progress and findings of the study, with a final report being due in 2016.

Dr. Clare Harvey RN, BA(Cur), MA, PhD, MRCNA

“The first training programme is scheduled towards the end of this year.”

The first set of data has been entered which already shows some interesting comparisons. An annual report will be provided to both Flinders

W1 DISTRICT CHAIRMAN'S REPORT 2011

I recently attended the Forrestfield High Wycombe changeover diner and received a donation of \$500 toward the new bus. Geraldton held a fun day in July and pledged a donation to the Lions Cancer Institute also.

Fortunately the AGM in Bunbury was successful, and at the Lions Cancer Institute meeting in June PDG Colin Beachamp was elected as Chairman. Lion Tony Turner was elected Vice Chairman.

It is my goal to keep all clubs informed of the work done by Lions supporting the fight against cancer. I hope to include further information on the research done by the recipients of Lions Cancer Institute fund in future reports. I will also keep clubs informed on the progress of acquiring and fitting out the new Skin Cancer Bus. We are in the process of issuing a new letter keeping you up to date; the first copy should be with the Cabinet Secretary by the end of the month.

Thank you for the opportunity to hold the position of Cancer Chairman, District 201 W1 for the year 2011/2012.

Mary Austin
Cancer Chariman
District 201 W1

W2 DISTRICT CHAIRMAN'S REPORT 2011

With each completed screening the percentage of possible skin cancers discovered continues to be very high. This is a worrying fact of the programme intended to be a preventative one, because many of these lesions are considered life threatening.

It would be infinitely preferable to have people attend their GP at an earlier date rather than wait for free screening.

An example of this; a recent screening at Nedlands where 71 were screened there was 17 referrals of which 11 were considered to be possibly life threatening. Two of those 11 have already had their melanomas excised.

Makes one wonder as Nedlands is close to a number of skin screening facilities.

SCREENING FOR MINING AREAS— this service is provided for several reasons:

- Mining company employees are members of the public;
- Many are Lions that live in remote areas where screening services are not readily available ;
- and support funding can often be obtained through such groups as Regional Development Commission.

The very high pick up rates of life threatening lesion found again, proves that the service is very much needed.

Westrac, the only corporate screening undertaken to date has donated \$12,000 towards the new unit (equates to 12 screening days) and may financially assist with some equipment. Screenings for that company (which has resulted in a fairly high pick up rate) have been undertaken at Guildford, Welshpool,

Kalgoorlie, Bunbury, Geraldton & Murrant.

Raffle - with much effort your institute raised \$28,000. This will considerably reduce the effort now needed to fully fund the new screening unit. An application granted US\$75,000 has been lodged with the Lions Club International Foundation to assist with the new unit.

New Screening Unit— there will still be a need to raise a considerable amount to fully cover the total unit costs and once again Clubs are asked to help financially.

Tapestry - Armadale-Kelmscott Lion, Lillian Trewarn, has most generously donated an exquisite classical tapestry (professionally valued at \$4,500) to your Institute as a fundraiser.

It may be worthwhile Clubs considering donating other items for auction. Such an auction may also prove to be a valuable public relations exercise.

FELLOW LIONS

YOUR SKIN CANCER SCREENING PROGRAMME SAVES LIVES. TO KEEP THIS HAPPENING YOUR DONATIONS ARE VITAL. UNFORTUNATELY DONATIONS RECEIVED THIS YEAR ARE NOT AS HIGH IN PREVIOUS YEARS

Mary Gregg
Cancer Chairman
District 201 W2

TERRY BOYLE

The highlight of the last 12 months for me was having an article about sedentary work and colorectal cancer risk published in the American Journal of Epidemiology.

This is a prestigious journal, so it was very exciting and rewarding to have a paper accepted. This paper was also judged to be the best 2010 Clinical Medicine paper published by a UWA student.

The study got a lot of media coverage both here and overseas - I was interviewed by Channel 10 Perth news, national ABC TV news, and several newspaper and magazine journalists.

I have four articles under review or in preparation at the moment - one about physical activity and the risk of colorectal cancer, one about resistance training and the risk of colorectal cancer, and two about research methods.

I've given presentations based on this work at conferences in Perth and Sydney last year and in Montreal this year. I'm aiming to finish my PhD in April next year and am on track to do that.

I am very grateful to be receiving the Lions Cancer Institute top-up scholarship, as it really

does take off some financial pressure and allows me to concentrate on my research.

Terry Boyle

PhD Candidate

CHRIS LOWINGS

RGN, MHN(CREDENTIALLED) BNG GRADDIP (RURAL & REMOTE MENTAL HLTH NURS.) MASTER OF SPECIALIST NURSING, CERT. IN PRIMARY CARE MEDICINE (SKIN CANCER), ADV CERT IN DERMOSCOPY & DIGITAL IMAGING, NURSE PRACTITIONER (CANDIDATE) MRCNA, MACMHN

Another year has streaked by and I am now looking at completing my studies in the Nurse Practitioner (NP) program.

With the completion of the program comes authorisation to work in the extended practice role of the Nurse Practitioner. It brings with it the opportunity to extend the range of work, including training, that can be done to sustain and expand the important primary care work carried out by Lions Cancer Institute.

During the course of my studies I have enjoyed the kind support of the Lions Cancer Institute (LCI) and Mr Colin Beauchamp.

As a supported student I am now involved as part of the five year project being conducted between Lions Cancer and Flinders University of South Australia looking specifically at developing ways in which future NPs can participate in building and sustaining the vital primary care work being done by Lions in rural, remote and regional centres across Western Australia.

The Lions Cancer Institute initiative has been so successful that Lions clubs of South Australia and Northern Territory have joined the project with the aim of replicating the same service in their district.

The work requires a lot of dedication and since 1989 Colin has provided the passion to carry this work forward.

The strategy now being employed through the Lions Cancer / Flinders University partnership will ensure the continuation of skin cancer initiatives that will provide an extremely vital primary care service to the people of WA and the expansion of the program into other States into the future.

CHRIS LOWINGS

SKIN CANCER RISKS

A persons risk of skin cancer can increase with these following factors:

- 5 or more moles are present on your arms, not including freckles.
- If skin cancer or a non malignant mole has been previously removed
- If they have an inflamed sore that doesn't heal or a mole or freckle that is changing colour
- If they have a family history of melanoma
- If as a child they has blistering sunburn, bad enough to keep them out of school
- Skin damage caused from UVR (Ultra violet radiation) exposure. Accumulated skin damage can become skin cancer
- If they are an indoor worker who enjoys bursts of sun at the weekends or when on holidays

Skin cancer can be prevented:

- Avoid direct sunlight between the hours of 10 am and 3pm
- Use shade where possible
- Wear a broad brimmed hat
- Wear suitable clothing that covers most of the skin
- Use water resistant SPF 30 sunscreen to cover all areas not covered by clothes. Apply regularly.
- Use Australian Standard sun glasses to protect eyes
- **Have between your toes, and the soles of your feet, checked. Mutant damages cells can travel and damaged upper body skin may show as skin cancer anywhere**

WARNING:

**Skin damage can not
be reversed;
only further damage
can be prevented**

Is that TAN *really* worth it?

LIONS CANCER INSTITUTE INC
A.B.N. 49 158 959 834

DIRECTOR'S REPORT

Your directors submit this report on the entity for the financial year ended 30 June 2011.

Directors

The names of directors throughout the year and at the date of this report are:

Mr G Irvine
Mr C Beachamp JP
Mr B Huey
Mr B Laundry
Mrs D Bushe-Jones
Mr D Mainard
Ms D Thomson
Mr D Wheeler
Mr G Winters (resigned in 29 February 2011)
Ms J Forsyth
Ms M Gregg
Mr N Saunders (appointed in January 2011)
Mr P Katris
Mr T Gray
Mr T Turner

Directors have been in office since the start of the financial year to the date of this report unless otherwise stated.

Principal Activities

The principal activities of the association during the financial year were to provide social facilities to members of the association.

Significant Changes

No significant change in the nature of these activities occurred during the year.

Operating Results

The net profit of the entity is \$60,704.

Signed in accordance with a resolution of the Board of Directors.

Director

Director

Dated: 16/04/2012

ANNUAL FINANCIAL REPORT

Annual Financial Report

For the year ending 30th June 2011.

Again there are significant changes in this year's results compared to last year.

Donations from Clubs show an increase of over \$9,000.00 and this is greatly appreciated.

Corporate donations also increased as did private donations.

The raffle income of \$22,540.00 has significantly helped the Institute to show a profit for this financial year. It was disappointing that so few Clubs supported this fundraiser and considering it is only held every second year, next year could see the Institute funds in short supply again.

Our vehicle repairs were considerably less this year than last as were our commitments to research grants.

My thanks go to Graeme Winters, the Institute Treasurer up to the end of December, for the way he kept the books up to date and the assistance and advice he has given me in the short time I have been in the chair.

PDG NEIL SAUNDERS, TREASURER.

September 2011.

“Donations from Clubs show an increase of over \$9,000.00 and this is greatly appreciated.”

NOTES TO THE FINANCIAL STATEMENTS

NOTE 1.

STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

The directors have prepared these financial statements as a special purpose financial report as they have determined that the Lions Cancer Institute Inc. ('Institute') is not a reporting entity. Accordingly they are to apply Accounting Standards and other mandatory professional reporting requirements in the preparation and presentation of these financial statements.

The special purpose financial statements are prepared to satisfy the reporting requirements of the Association Incorporation Act (WA), Charitable collections Act (1946) and the Charitable Collections Regulations (1947).

The financial statements have been prepared on the accruals basis using historical costs. They do not take into account changing in money values.

The following specific accounting policies have been adopted in the preparation of these financial statements.

INCOME TAX

The Institute, an incorporated body, is an exempt body for income tax purposes and accordingly the financial statements do not account for income tax.

PLANT AND EQUIPMENT

Property, plant and equipment are included at cost. All items of property and equipment are depreciated over their useful lives, as determined by the directors, commencing from the time the item is held ready for use.

INTEREST RECEIVED

Interest is brought to account when received or credited to the related bank/investment account. Interest earned but not received at balance date has not been brought to account at that date.

DONATIONS AND OTHER FUND RAISING ACTIVITIES

The directors have determined that it is not practicable to establish adequate and effective control over monies received from these sources. Accordingly, income from these sources is brought to account on the basis of amounts actually recorded in the Institute's books.

LIONS CANCER INSTITUTE INC
A.B.N. 49 158 959 834

STATEMENT BY THE BOARD OF DIRECTORS
FOR THE YEAR ENDED 30 JUNE 2011

The directors have determined that the Association is not a reporting entity and that this special purpose financial statements should be prepared in accordance with the accounting policies described in Note 1 to the financial statements, solely for the use of the Board of Directors in accordance with the Association's constitution, so as to comply with the provisions of the Charitable Collections Act 1946.

In the directors opinion the financial report set out from page 3 to page 8:

1. Presents a true and fair view of the financial position of Lions Cancer Institute Inc. as at 30 June 2011 and its performance for the year ended on that date.
2. At the date of this statement, there are reasonable grounds to believe that Lions Cancer Institute Inc. will be able to pay its debts as and when they fall due.

This statement is made in accordance with a resolution of the Board of Directors and is signed for and on behalf of the Board of Directors by:

Director

Director

Dated: 16/04/2012.

INDEPENDENT AUDIT REPORT
TO THE MEMBERS OF
LIONS CANCER INSTITUTE INC

Report on the Financial Report

We have audited the accompanying financial report, being a special purpose financial report, of Lions Cancer Institute Inc, which comprises the statement of financial position as at 30 June 2011, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, a summary of significant accounting policies, other explanatory notes and the Directors declaration.

The Responsibility of Directors for the Financial Report

The Directors of the association are responsible for the preparation and fair presentation of the financial report and have determined that the accounting policies described in Note 1 to the financial statements which form part of the financial report are appropriate to meet the financial reporting requirements of the Institute and are appropriate to meet the needs of the members. The Directors responsibility also includes establishing and maintaining internal control relevant to the preparation and fair presentation of the financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial report based on our audit. No opinion is expressed as to whether the accounting policies used, as described in Note 1, are appropriate to meet the needs of the members. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the association's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the association's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by Directors, as well as evaluating the overall presentation of the financial report.

The financial report has been prepared for distribution to members for the purpose of fulfilling the Directors financial reporting under the Institute. We disclaim any assumption of responsibility for any reliance on this report or on the financial report to which it relates to any person other than the members, or for any purpose other than that for which it was prepared.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

INDEPENDENT AUDIT REPORT
TO THE MEMBERS OF
LIONS CANCER INSTITUTE INC

Independence

In conducting our audit, we have complied with the independence requirements of Australian professional accounting bodies.

Qualification

The directors have determined that it is not practicable to establish satisfactory control over monies received from donations and other fund raising activities prior to recording in the Institute's financial records. Hence my audit procedures relating to income from those sources have been restricted to the amounts recorded in the Institute's financial records. I am therefore unable to express an opinion whether revenue from donations and other fund raising activities, included in the accompanying financial report, is complete.

Auditor's Opinion

In my opinion, except for the effect on the financial statements of the matter referred to in the qualification paragraph, the attached financial report presents fairly, in all material respects the financial position of the Institute at 30 June 2011 and of the financial performance for the year then ended, in accordance with the accounting policies described in Note 1 to the financial statements.

APPENDIX

Appendix A

SOURCE(S) OF VOLUNTARY REVENUE

The sources of voluntary revenue received by the licence holder during the financial year were as follows;

- * Cash donations received directly from people (including street door-to-door collections, postal collections collection boxes and organised fundraising appeals).

Appendix B

SIGNIFICANT CONTROL REQUIREMENTS

The financial management and fundraising activities of the licence holder should be conducted in accordance with, but not limited to, the following provisions of Regulations:

Financial Management

- * Monies received should be banked within seven (7) days of receipt in accordance with regulation 11(a)
- * An asset register should be maintained in accordance with regulation 11(c)
- * Every bank account should be operated by two (2) officers of the organisation in accordance with regulation 11(d)
- * Investments should be in accordance with regulation 16 of the Charitable Collections Amendment Regulations (1998)

Fundraising

- * Monies received from collectors and fundraisers should be paid to the licence holder within fourteen (14) days of receipt in accordance with regulation 11 (b) of the regulations
- * Receipts should be completed for all monies received
- * The Statement of comprehensive income should be sufficiently detailed to enable identification of all charitable collections received and the manner in which the collections have been dealt with;
- * Fundraising expenses (i.e. salaries, wages, commissions and any professional fundraising fees) should be disclosed separately in the accounts
- * The licence holder should be collecting monies and goods, and should be disbursing those monies

RFDS REPORT

Happy 5th Birthday to the RFDS on the Road and Lions Cancer Institute (LCI) skin cancer screening partnership!

Over the past five years our two organisations, with funding support from BHP Billiton Iron Ore, BHP Billiton Nickel West, the Pilbara Fund, the Gold Fields Australia Foundation, Woodside Energy, Rio Tinto and many local Shire Councils and businesses, have provided free skin cancer screening people living in the remote Pilbara and Goldfields regions of WA.

RFDS on the Road is very proud to have been able to facilitate the delivery of this important disease screening initiative into regional WA, as access to this type of preventative healthcare service is unavailable in most parts of county WA.

To date we have provided free skin cancer screening for more than 9,500 people living in regional Western Australia. The annual average referral rate from our visits for suspicious lesions requiring follow up for diagnosis and / or treatment has ranged from 24 – 29%. This is an alarming statistic that reinforces the ongoing need for education about awareness and prevention of skin cancer.

This year a total of 1,540 Goldfields residents took the opportunity to attend the free skin cancer screening service, made up of 784 males and 756 females. This was slightly less than in 2009, however, wet weather, less screeners and the use of only two screening rooms impacted the number that were screened.

In 2011 the screening team consisted of one or two LCI professional volunteer screeners, a Lions International data entry volunteer, RFDS Coordinator/ Health Promotion Nurse, and RFDS Project Officer.

The LCI mobile screening unit visited 14 communities over a three month period from April to June (31 days 'on the road'). The skin screening service included:

Free full body skin cancer check

Dissemination of Skin Cancer information via pamphlet and verbally

Distribution of free broad brim hats and sunscreen to participants

Dissemination of other Cancer information and RFDS on the Road Program information

Again, we had a great team of staff and volunteers, all of whom were passionate about promoting awareness and prevention of skin cancer. None could claim to be more passionate than Colin Beauchamp and Sue Goddard – together they are the force behind this remarkable LCI Service.

Thank you most sincerely Colin and Sue for the hours of time, sweat, tears, organisation, maintenance, encouragement and mentoring you both contribute to the LCI skin cancer screening service and the partnership with the RFDS on the Road Program.

2012 looks bright and interesting in terms of expanding this unique service further into remote WA, through our partnership. RFDS on the Road was successful in securing funds from Royalties for Regions to support a skin cancer screening project across the Kimberley region in 2012; currently proposed for delivery in May and June. In addition, we plan to travel back through the Pilbara region during July and August, providing free skin cancer screening at 13 local communities.

The RFDS on the Road team extends its sincere thanks to the LCI for the opportunity to work together to improve the health and wellbeing of people living in regional Western Australia. We look forward to doing so again in 2012, and beyond.
